FULL STACK WEB DEVELOPER (with a focus on LEGAL TECH)

noyb.eu is a non profit organization working on enforcement actions under GDPR, which came into force in May 2018. For this task we are building a pan-European team to work on strategic litigation to ensure that GDPR is respected in practice. We focus on strategic, innovative and effective enforcement of wilful privacy violations of major players. *noyb* tackles privacy violations of private actors across the Europe. We work together with national institutions in the consumer, privacy and tech sector - and hopefully with you!

Max Schrems, *Chairperson*

Key tasks:

- Front and backend development of existing and new web-based systems (e.g. apps for group actions, automated legal systems) for "*legal tech*" system in the area of GDPR (like automated exercise of GDPR rights, automated detection of codes, collective redress systems and class action platforms)
- Administration of existing internal systems together with colleagues (like Drupal or Mediawiki)
- Supporting our legal team on technical questions

What we offer:

- A position for a full stack software development with a focus on "*legal tech*"
- A unique opportunity to help shape the right to privacy
- Quick and inclusive decision making processes
- Modern and self-determined working conditions and hours
- A diverse and truly pan-European team

Key Details

- Workplace: Our office is in Vienna, Austria. Partly remote work is possible and we are open to individual solutions.
- 20-40 hours/week, one year contract (prolongation possible)
- Combination with external work (e.g. freelance) possible
- Salary starting from € 44.000* for 40h - considerably higher salaries possible, depending on experience and qualifications
- Free public transport, lunch & Club Mate
- Moving assistance for out of town applicants

Your application:

- Curriculum vitae
- Examples of and links to previous work

...via email to Max Angerbauer (ma@noyb.eu) - you can also contact Max with further questions!

Minimal requirements:

- Relevant tech degrees
- Good "all round" knowledge of IT topics
- Knowledge in current frontend technologies
- Experience in developing web applications
- Experience in Linux or BSD
- JavaScript knowledge
- Ruby or Python
- Good team worker and good communication skills
- Fluent in English (internal working language)
- No relevant conflicts of interest
- Good self-organizing and time management skills
- Hands on mentality and high efficiency

Additional skills that would be helpful:

- Experience with Browser Plug-Ins (Chrome and Firefox)
- Experience with PHP
- Experience with Drupal (CMS)
- Skills in software analysis that allow testing software products for privacy violations
- Embedded in tech community to facilitate a steady exchange of information
- Given our unique position, we aim to surpass standard security and privacy approaches. Willingness to go the extra mile and come up with novel and practical approached to these issues is essential for us.

*Please note: Austrian employment law requires to publish a minimum wage. Considerably higher salaries are possible, depending on qualifications.
